To whom it may concern

Subject : RBS Treeworks

We have used RBS Treeworks on several occasions, most recently several months ago to offer advice and subsequent tree surgery on a fairly large Eucalyptus tree we have at the bottom of our garden. The tree stood approximately 45ft tall.

They provided a very professional and knowledgeable service to our initial enquiry about the tree's structure and safety and then a very efficient service when we had the tree pruned removing 10 - 15 feet off the height and re-shaping the canopy to account for the reduction in height. Additionally a number of large branches were also removed.

Whilst we are not experts in Health and Safety as it applies to tree surgery they appeared to take all appropriate precautions to keep the site safe and used appropriate safety gear and PPE.

The site was cleared of all debris and left clean and tidy and they took the trouble to explain everything they were doing which included speaking with our neighbours.

We have no hesitation in recommending them and will be using them to regularly maintain this tree as it is one of the main features of our garden.

Yours sincerely
